

A decorative rectangular border with ornate, symmetrical scrollwork and floral patterns at the corners and midpoints, enclosing the title and subtitle.

# **METALLURGIA**

*THE BRITISH JOURNAL OF METALS*

Index to Vol. XII.  
May, 1935—October, 1935.

KENNEDY PRESS LIMITED  
— 21, Albion Street —  
GAYTHORN, MANCHESTER 1

# INDEX

A		Page			Page
Anomaly, Exploitation of Kursk Magnetic	5		Construction, Use of Magnesium Alloys in Aircraft, By E. Player	61-65	
Alloys, Their Atomic Arrangement, Metals and	6		Combined Wire Drawing and Heading, Equipment Used in Bolt Making	67	
Alloys, Iron-chromium, Iron-chromium Nickel and Related	8		Canada's Active Mineral Exploration, Programme	74	
Alloy Cast Irons, By J. E. Hurst	15-18		Consumption Analysis, Tin	96	
Analysis, Tin Consumption	32		Chemical Industry, Material Problems in the German	99-100	
Alloy Manufacture, Nickel and Nickel	33-34		Coke-oven Gas, De-tarring of	100	
Aluminium-bronze—Its Properties and Applications	35-37		Chemical Standard, A New British	101	
Alloy Steels and Aircraft Construction, By W. H. Hatfield, F.R.S.	45-48		Cutting, Metal	116	
Aircraft Construction and Metallurgy	49		Corrosion, Marine, By J. W. Donaldson, D.Sc.	117-118	
Aluminium Alloys, The Effects of Thermic Treatment upon the Physical Properties of	51-56		Cold Work Action on Stainless Steels, By Richard Saxton	119-120	
Alloys in Aircraft Construction, Use of Magnesium, By E. Player	61-65		Canada's Geological Field Programme	122	
Alloy Tubes and Sections, Hiduminium	69		Contracts, Some Recent	132	
Active Mineral Exploration Programme, Canada's	74		Cumberland Iron and Steel Works	135-138	
A Study of the Elastic Properties of Certain Specimens of Mild Steel, By J. E. Hurst	85-86		Copper Mining and Smelting in Germany, By O. Bertoya	165-168	
A New British Chemical Standard	101		Car Production, Metallurgy and Motor	169	
Aircraft, Materials and Testings	110		Copper Stools for Ingot Moulds	175	
Axle Gears, Rear	112		Coal, Petrol from	181-182	
Action on Stainless Steels, Cold Work, By Richard Saxton	119-120		Containing Lead, Brass and Bronzes	186	
A Scientifically Designed Bunsen Burner	127-128				
Alloy, A New Piston	140				
Alloys, Magnesium Sand and Die-cast	156				
Alloys, Electric Resistance	173-174				
Automobile Engineering, Inspection of Materials in	187-188				
B			D		
British Iron and Steel Industry, Progress in the	1-5		Development in Manufacture of Seamless Tubes, By Gilbert Evans	27-28	
Blending for Steam Generation	13		Drawing and Heading Equipment Used in Bolt Making, Combined Wire	67	
British Industries Fair, The	19-26		Development of the Krupp Works at Essen	77-80	
Bronze—Its Properties and Applications, Aluminium	35-37		De-tarring of Coke-oven Gas	100	
British Empire, Trade of the United States with the	50		Designed Bunsen Burner, A Scientifically	127-128	
Base Metal Production	56		Die-cast Alloys, Magnesium Sand and	156	
Bolt Making, Combined Wire Drawing and Heading Equipment Used in	67		Development of Steel-making Processes, Evolution and	185	
British Foundry School, The	80		E		
Bibliography of Non-metallic Inclusions in Iron and Steel	82		Exploitation of Kursk Magnetic Anomaly	5	
British Foundrymen Meet at Sheffield	91-95		Electric Furnaces in Industrial Heat-treatment, Use of, By A. Glynne Lobley, M.Sc.	9-13	
British Chemical Standard, A New	101		Physical Properties of Aluminium Alloys, The, By J. Towns Robinson	51-56	
Bunsen Burner, A Scientifically Designed	127-128		Electric Pyrometers, The Installation and Maintenance of Thermo, By G. H. Barker	57-58	
Ball-bearing Plant, World's Largest	168		Equipment Used in Bolt Making, Combined Wire Drawing and Heading	67	
British Foundry School	170		Exploration Programme, Canada's Active Mineral	74	
Brass and Bronzes Containing Lead	186		Essen, Development of the Krupp Works at	77-80	
C			Export Trade and Prosperity	81	
Confidence, Growing	7		Elastic Properties of Certain Specimens of Mild Steel, A Study of the, By J. E. Hurst	85-86	
Cast Irons, Alloy, By J. E. Hurst	15-18		Electric Thermic Pyrometer, The Installation and Maintenance of, Part III, By G. H. Barker	121-122	
Canadian Radium Industry now Firmly Established	32		Engineering, Machinery and Foundry Trades Exhibition, The Shipping	145-150	
Consumption Analysis, Tin	32				
Construction, Alloy Steels and Aircraft, By W. H. Hatfield, F.R.S.	45-48				
F			F		
Electric Resistance Alloys	173-174		Furnaces in Industrial Heat-treatment, Use of Electric, By A. Glynne Lobley, M.Sc.	9-13	
Electro-magnetic Equipment for the Metal Trades, By W. E. Box	177-180		Fair, The British Industries	19-26	
Engineering Metals, The Testing of	183-194		Finesness Test of Moulding Sand, Use of the Pipette Method in the	68	
Evolution and Development of Steel-making Processes	185		Foundry School, The British	80	
Engineering, Inspection of Materials in Automobile	187-188		Foundrymen Meet at Sheffield, British	91-95	
F			Field Programme, Canada's Geological	122	
			Foundry Trades' Exhibition, The Shipping, Engineering, Machinery and	145-150	
			Foundry School, The British	170

Inclusions in Steel, Non-metallic.	
By G. R. Bolsover, F.Inst.P.	83-84
Industry Production, Soviet Heavy	84
Installation and Maintenance of	
Thermo-electric Pyrometers, The.	
Part 2. By G. H. Barker	87-89
Institute, The Lomonsov	90
Industry, Material Problems in the	
German Chemical	99-100
Industry, The Organisation of	111
Installation and Maintenance of	
Electro-thermic Pyrometers, The.	
Part III. By G. H. Barker	121-122
Iron and Steel Works, Cumberland	
	135-138
Iron and Steel Institute	141-144
Institute of Metals	153-156
Influence of Nozzle Refractories on	
Teeming Speeds of Ingots. By A.	
Jackson	158-160
Ingot Moulds, Copper Stools for	175
Inspection of Materials in Auto-	
mobile Engineering	187-188

## K

Kursk Magnetic Anomaly, Exploita-	
tion of	5
"K" Monel Metal	70
Krupp Works at Essen, Develop-	
ment of the	77-80

## L

Length Variation of Nickel on	
Quenching. By H. Goulbourne	
Jones, M.Sc.	86
Lomonsov Institute, The	90
Laboratory, The Physical National	101
Largest Ball-bearing Plant, World's	168
Lead, Brass and Bronzes Containing	186

## M

Magnetic Anomaly, Exploitation of	
Kursk	5
Metals and Alloys, Their Atomic	
Arrangement	6
Manufacture of Seamless Tubes,	
Development in. By Gilbert	
Evans	27-28
Materials, Standards of Refractory	31
Manufacture, Nickel and Nickel	
Alloy	33-34
Metallurgical Researches in U.S.S.R.	37
Metal Production, Base	56
Maintenance of Thermo-electric Py-	
rometers, The Installation and.	
By G. H. Barker	57-58
Magnetism in the U.S.S.R., Study of	59
Magnesium Alloys in Aircraft Con-	
struction, Use of. By E. Player	61-65
Moscow Institute of Mineral Re-	
sources	68
Method in the Fineness Test of	
Moulding Sand, Use of the	68
Monel Steel, "K"	70
Mineral Exploration Programme,	
Canada's Active	74
Maintenance of Thermo-electric Py-	
rometers, The Installation and.	
Part 2. By G. H. Barker	87-89
Meet at Sheffield, British Foundry-	
men	91-95
Material Problems in the German	
Chemical Industry	99-100
Metals, Testing Tin Sheet	100
Manufacture, Propeller. By Wm.	
Ashcroft	107-110
Materials and Testings, Aircraft	110
Manufacture, Seamless Tube. By	
Gilbert Evans	113-115
Metal Cutting	116
Marine Corrosion. By J. W. Donald-	
son, B.Sc.	117-118
Maintenance of Electro-thermic Py-	
rometers, The Installation and.	
Part 3. By G. H. Barker	121-122
Metal Melting	139
Machinery, and Foundry Trades'	
Exhibition, The Shipping, En-	
gineering	145-150

Metallurgy Masters' Technique of	
Production, Soviet	150
Metals, Institute of	153-156
Magnuminum Sand and Die-cast	
Alloys	156
Mining and Smelting in Germany,	
Copper. By A. Bertoya	165-168
Metallurgy and Motor-car Produc-	
tion	169
Manganese Steel, High. By L.	
Sanderson	171-172
Magnitogorsk Metal Plant	174
Moulds, Copper Stools for Ingot	175
Magnetic Equipment for the Metal	
Trades, Electric. By W. E.	
Box	177-180
Materials, The Testing of Engineer-	
ing	187-194
Materials in Automobile Engineer-	
ing, Inspection of	187-188

## N

Nickel and Related Alloys, Iron-	
chromium, Iron-chromium-nickel	
and	8
Nickel and Nickel Alloy Manu-	
facture	33-34
Non-metallic Inclusions in Iron and	
Steel, Bibliography of	82
Non-metallic Inclusions in Steel.	
By G. R. Bolsover, F.Inst.P.	83-84
Nickel on Quenching, Length Vari-	
ation on. By H. Goulbourne	
Jones, M.Sc.	86
National Physical Laboratory, The	101
New British Chemical Standard, A	101
New Piston Alloy, A	140
Nozzle Refractories on Teeming	
Speeds of Ingots, The Influence	
of. By A. Jackson	158-160

## O

On Quenching, Length Variation of	
Nickel. By H. Goulbourne Jones,	
M.Sc.	86
Oven Gas, De-tarring of Coke	100
Organisation of Industry, The	111
Of Engineering Metals, The Testing	183-194

## P

Progress in the British Iron and	
Steel Industry	1-5
Physical Properties of Aluminium	
Alloys, The Effects of Thermic	
Treatment Upon the. By J.	
Towns Robinson	51-56
Production, Base Metal	56
Pyrometers, The Installation and	
Maintenance of Thermo-electric.	
By G. H. Barker	57-58
Pretoria Steel Works, The	65
Pipette Method in the Fineness Test	
of Moulding Sand, Use of the	68
Programme, Canada's Active Mineral	
Exploration	74
Prosperity, Export Trade and	81
Production, Soviet Heavy Industry	84
Properties of Certain Specimens of	
Mild Steel, A Study of the	
Elastic. By J. E. Hurst	85-86
Problems in the German Chemical	
Industry, Material	99-100
Physical Laboratory, The National	101
Propeller Manufacture. By Wm.	
Ashcroft	107-110
Pyrometer, The Installation and	
Maintenance of Electro-thermic.	
Part 3. By G. H. Barker	121-122
Petrography in U.S.S.R., The Study	
of	128
Piston Alloy, A New	140
Production, Soviet Metallurgy Mas-	
ters' Technique	150
Plant, World's Largest Ball-bearing	168
Production, Metallurgy and Motor-	
car	169

Plant, Magnitogorsk Metal	174
Petrol from Coal	181-182
Processes, Evolution and Develop-	
ment of Steel Making	185

## Q

Quenching, Length Variation of	
Nickel on. By H. Goulbourne	
Jones, M.Sc.	86

## R

Related Alloys, Iron-chromium,	
Iron-chromium-nickel and	8
Refractory Materials, Standards of	31
Radium, Industry now Firmly	
Established, Canadian	32
Researches in U.S.S.R., Metallur-	
gical	37
Resources, Moscow Institute of	
Mineral	68
Rear Axle Gears	112
Recent Contracts, Some	132
Researches Relating to Tin	140
Recovery of Gold and Silver, Studies	
in the	151-152
Refractories on Teeming Speeds of	
Ingots, The Influence of Nozzle.	
By A. Jackson	158-160
Resistance Alloys, Electric	173-174

## S

Steel Industry, Progress in the	
British Iron and	1-5
Silumin-Gamma	8
Steam Generation, Blending for	
Seamless Tubes, Development in	
Manufacture of. By Gilbert	
Evans	13
Steel, The Welding of Iron and	29-31
Standards of Refractory Materials	31
Steel Institute, The Iron and	39-41
Steels and Aircraft Construction,	
Alloy. By Dr. W. H. Hatfield,	
F.R.S.	45-48
Study of Magnetism in the U.S.S.R.	59
Steel Works, The Pretoria	65
Sand, Use of the Pipette Method in	
the Fineness Test of Moulding	68
Sections, Hiduminium Alloy Tubes	
and	69
School, The British Foundry	80
Steel, Bibliography of Non-metallic	
Inclusions in Iron and	82
Steel, Non-metallic Inclusions in.	
By G. R. Bolsover, F.Inst.P.	83-84
Soviet Heavy Industry Production	84
Study of the Elastic Properties of	
Certain Specimens of Mild Steel.	
By J. E. Hurst	85-86
Sheffield, British Foundrymen meet	
at	91-95
Sheet Metals, Testing Tin	100
Standard, A New British Chemical	101
Seamless Tube Manufacture. By	
Gilbert Evans	113-115
Stainless Steels, Cold Work Action	
On. By R. Saxton	119-120
Steel Works, Cumberland Iron and	
	135-138
Steel Institute, Iron and	141-144
Shipping, Engineering, Machinery	
and Foundry Trades Exhibition,	
The	145-150
Soviet Metallurgy Masters' Technique	
of Production	150
Studies in the Recovery of Gold and	
Silver	151-152
Sand and Die-cast Alloys, Magnu-	
minium	156
Speeds of Ingots, The Influence of	
Nozzle Refractories on Teeming.	
By A. Jackson	158-160
Smelting in Germany, Copper Min-	
ing and. By O. Bertoya	165-168
School, British Foundry	170
Steel, High Manganese By L.	
Sanderson	171-172
Stools for Ingot Moulds, Copper	175
Steel-making Processes, Evolution	
and Development of	185
